PROFILE

A motivated and detail-oriented web developer with a strong foundation in HTML, CSS, and JavaScript, coupled with a passion for creating user-friendly and visually appealing websites.

PROJECT

Digital Clock
Sep 2024 - Sep 2024
- A digital clock project in JavaScript displays the current time dynamically, updating in real-time. It uses HTML and CSS for the clock interface and JavaScript for functionality, leveraging methods like objects, and DOM manipulation to show hours, minutes, and seconds.

Age Calculator
Oct 2024 - Oct 2024
- A simple JavaScript project that calculates a person's age based on their date of birth. Users input their birthdate, and the program instantly displays their age in years, months, and days.

OTP GENERATOR
JAN 2025 - JAN 2025
An OTP Generator is a lightweight web application that creates secure, random One-Time Passwords (OTPs) for authentication purposes. Built using HTML, CSS, and JavaScript, it features a clean design and user-friendly functionality, generating 6-digit OTPs instantly, making it ideal for integrating security into applications or personal use.

EDUCATION

Bachelor of Computer Applications
Invertis University, bareilly
2022 - 2025

High School and Intermediate
RM Gyan Dayini Inter College, Lakhimpur-kheri
2017 - 2019
